Grand Aggregate

This award is presented to the Charter with the best overall performance in all five events. At the completion of round robin play, each Charter represented, receives points equal to two (2) times the total number of entries. The second place Charter receives two (2) points less than the winner. The third place Charter receives two (2) points less than second and so on until each Charter has received a standing.

The points are accumulated for all five events. If two Charters are tied in an event, the total points for both placements are divided equally, i.e. two teams may be tied for second place. They would each have the total points credited to both second and third place divided by two.

Year	Charter
